**About Dr. Harvey** Almost 30 years ago, Dr. Harvey Cohen began to have serious doubts about commercial pet foods. As a nutritionist and animal lover, Dr. Harvey, began to lecture to all who would listen about the dangers of chemicals, dyes and preservatives that were being put into pet foods and fed to dogs, cats and birds.

At about the same time in his human practice in New York City, he began to hear from his patients of case after case of cancer, kidney disease, allergies and many other degenerative diseases in their pets.

## Health Begins in the Kitchen

He began to research the reasons for this overwhelming rise of disease in companion animals and came to believe that the foods that we feed our pets are ultimately the key to their good health. Dr. Harvey believes now what he believed then, that **“health begins in the kitchen”** and that feeding companion animals pet food made from chemical laden and inferior quality ingredients is the number one reason for the rise in degenerative diseases in companion animals.

Dr. Harvey still believes that preparing fresh meals for your companions is absolutely essential to good health. He believes that no matter how good a kibble or canned food may be, it is still a kibbled or canned food and processed in a way that is inferior to a freshly prepared meal.

## All-Natural, Chemical and Preservative-Free Diet

Speak to anyone who has lost a dog to cancer or cat to kidney disease, and they will tell you” if I had only known earlier”. Most of them believed that they were doing the best for their companion. They were buying “premium” pet foods, they were feeding the most expensive brand, but unfortunately “premium or most expensive” does not add up to healthy animal.

## The Birth of Canine Health – The Miracle Dog Food- Homemade Food Made Easy

So the eccentric doctor who told everyone not to feed their pets, pet food, suddenly had everyone’s ear. Finding that there was a need for someone to make the foods that he had been teaching about, Dr. Harvey began to make his formula for dogs. He began to make the recipe that he had been telling everyone to make on their own and all along he refused to compromise. Every ingredient is human consumption only. He refuses to purchase “pet grade” ingredients or “seconds”.

He makes **Canine Health**, which over the years came to be known as the Miracle Dog Food, because so many people said, “my dog is better. It’s a miracle!” He insists that it be made fresh and the protein be added fresh daily. He makes it without preservatives and without chemicals.

**No Compromise – Only the best**

## We Make Our Food Fresh and We Want You to Make it Fresh

We do not private label our foods or have them made for us in another facility. All of our ingredients are added under the watchful eye of Dr. Harvey and because we make everything and package it ourselves we have the most stringent quality control.

### 100% Human Grade Ingredients ONLY

There is a bit of controversy about what “human grade” ingredients really means. At Dr. Harvey’s it means we only purchase ingredients that are sold for humans. We do not use “pet grade”, “feed grade” or “off grade” ingredients. We believe that animals should only eat foods that are fit for human consumption. These foods have more governmental regulations, which means that they are less likely to contain harmful ingredients.

### Our All-Natural Dog Foods Make Homemade Easy and Complete

If you are taking the extra time and energy to make fresh food daily for your companion, then it certainly pays to do it right. Dr. Harvey’s takes the guesswork out of homemade. Whether you choose [Canine Health-The Miracle Dog Food](#) or [Veg-to-Bowl](#) for a grain-free meal, you can make your homemade food with confidence.

### Raw Diets Made Easy

Feeding [meat alone is not enough](#) using Dr. Harvey’s Pre-Mixes make feeding a raw diet balanced. Raw diets can be complicated and Dr. Harvey’s makes any raw diet complete.

### Vitamins and Minerals

Dr. Harvey’s pre-mixes allow you to be sure that your companion is getting all of the vitamins and minerals that he or she needs in their daily diet. That is just what these pre-mixes provide for your companion on a daily basis, while making a fresh complete and “easy-to-prepare” meal.

### Fresh is Best and Here’s why...

We think fresh is best. Would you want to eat boxed cereal or canned food as your daily diet? No, of course you wouldn’t. And we don’t think your companion wants to either. We know that fresh is best and our pre-mixes make fresh possible. Even with a busy schedule it is possible to make a fresh meal for your companion every day. You can also make enough for a few days and keep it in the refrigerator. Our foods will stay fresh for 2-3 days in the refrigerator and can be frozen for traveling or for a sitter.

### Our Holistic Dog Foods Give You a Wide Variety of Vegetables and Herbs

Our foods make fresh meals with a wide variety of vegetables and herbs. Imagine if you were going to prepare 9 different vegetables daily for your companion? That would be a tremendous amount of work.

So [Canine Health](#) and [Veg-to-Bowl](#) give you all the variety that your companion needs and the preparation is quick and easy.

### You Add Your Own Meat and Control Fat and Calories

One of the great things about making fresh food is that it gives you control over what you are making. You can avoid meats that your dog or cat dislikes or is sensitive to and you can control the caloric intake making losing or gaining weight much easier.
